

## e-TimeLog

### Time and Attendance Web Solution Suite

Track and evaluate the performance and work activities of employees. Store, monitor and organize the most important employee time related information in one place. Use a single software application to track and monitor employee activities and management processes.

e-TimeLog is a flexible time and attendance suite that offers powerful features like instant overtime calculators, automatically applied organization rules and automatic email reminders. This time and attendance suite is conceived to reduce employee presence in management administration and at the same time be able to provide accurate preparation of payroll data for any company despite size, even for complex bodies and organizations such as banks, municipalities, governmental organizations etc, all that in an automated way of data collection.

### I»» Benefits of e-TimeLog:

**Customized Solution**  
Developed from scratch by GCC Computers Ltd, e-TimeLog can easily create tailored business rules that drive your organization's time schedule.

**Scalable Solution**  
NO boundaries, e-TimeLog can grow with your business.

**Eliminate paper hassles**

**Accommodate complicated time reporting practices**

### System Software Modules:

e-TimeLog includes four modules to support the four different user roles:

**End-user:**  
Enables the user to view and print reports based on their own personal data.

**Supervisor:**  
Enables the user to view and print reports based on their own personal data and their subordinates.

**Operator:**  
Enables the user to view, print and change the data of all users and also manage system parameters and access levels.

## e-TimeLog

### E-TimeLog Features:

#### Customized Solution

On-line, real-time employee tracking.

#### Easy, Simple GUI

All you need is a browser.

#### Flexible Reporting

Data are always available to produce any kind of report the customer wants. All reports can be printed referring to a precise period and/or department. This will enable users to produce reports over any period for a single employee or the whole company.

#### Smart Viewing

The data related to employees, departments, etc can be viewed in flexible formats.

#### Multilingual Skills

e-TimeLog can be used in different languages.

#### Data Import/Export

e-TimeLog allows the import/export of data.

#### Multi-user

e-TimeLog enforces working profiles to groups of employees and allows different data access levels to those different groups of employees.

#### Integration ability

- e-TimeLog can be integrated with various systems;
- Active directory for user authentication purposes;
- Existing annual leave systems to avoid double entries;
- Exports data in various formats (.xls, .mdb, and other tab delimited format files).
