## DC Infrastructure with Cloud Economics

Solution Description

# THE NEED

## FACTS

Modern IT infrastructure is making it possible to rapidly deliver services, optimize core business operations, enable service agility while fostering business growth. Your IT infrastructure needs to respond quickly to challenges with flexibility and adaptability, the characteristics of Cloud based compute service.

Organisations want that Cloud-like experience, but it must come in an era where no one cloud can meet all the needs of the business, data sovereignty is becoming a major issue and rigid local infrastructure limits the capabilities of IT.

Spectrum offers a consumption-based IT infrastructure service named Spectrum DC Infrastructure with Cloud Economics. The service provides your organisation with scalable and flexible IT infrastructure. Spectrum team of experts can help remove complexity and create a total solution across workloads. Our mission is to make IT infrastructure simple yet powerful.

## PROBLEM

- With traditional computing, businesses face high capital expenditure
- The need to use out-of-date technology due to budget and resource limitations is, well, an out-of-date trend
- Business computing used to be something only

# THE TECHNOLOGY

## DESCRIPTION

The service provides your organisation the flexibility of the public cloud on-premises and under your control. Complete IT Solution with hardware, software, and expertise on-premises in a pay-per-use model. Spectrum assumes the implementation of the solution, enabling the IT team to focus on business objectives.

Free up time for your IT staff to handle neglected tasks, like the strategy and planning that lead to innovation. A modern, connected, reliable and highly available infrastructure to meet the unpredictable workload growth. Enjoy piece of mind with capacity that's actively monitored, managed and easily ramped up ahead of workload demand.

Spectrum team is accustomed to handling complex projects and environments with mission-critical applications. We can help you comfortably house your core applications within a local cloud environment and even enable you to tailor it for your own innovation initiatives. All these are delivered on-premises for the security and control needed to meet any regulatory or business demands.

## SOLUTION

- Accelerate Innovation
- Faster time to Value
- Drive simplicity through the IT lifecycle
- Optimised Infrastructure
- Advisory, Professional and Operational Services
- Consumption based IT Infrastructure
- Pro-active capacity planning
- Outsourced upgrade cycles
- Lower TCO
- On-premise
- Cloud-like experience
